## [6] White Box Testing: Short Test

以下の関数 gcd をテストするため, gcd(1,1,1); gcd(100,50,25); gcd(6,3,90); というかたちで呼出したとする. **命令網羅率と分岐網羅率を求めなさい**.

(We now test the following function gcd by running gcd(1,1,1); gcd(100,50,25); gcd(6,3,90);. Compute the statement coverage and the branch coverage.)

命令網羅率の計算では,**行番号の付いている行のみ**を命令として数えなさい.条件分岐命令の場合は,そこでの**条件の評価が実行**に相当すると考えなさい.(For computing the statement coverage, count **only the numbered lines**, the ones having line numbers. An execution of a branch statement corresponds to **the evaluation of its condition**.)

```
Excel ファイル short-test06.xlsx の空欄を埋めて提出しなさい.
(Fill out short-test06.xlsx and submit it.)
```

```
int gcd (int x, int y, int z){
       int r, swap;
        if (x < 1 \mid | y < 1 \mid | z < 1)
 2:
           return -1;
 3:
        if (x == 1 | | y == 1 | | z == 1){
           return 1;
 5:
        if (x < y)
 6:
           swap = x;
 7:
           x = y;
 8:
           y = swap;
 9:
        r = x \% y;
        while (r'!=0){
10:
11:
           x = y;
           y = r;
12:
           r = x \% y;
13:
        if (y < z)
14:
15:
           swap = y;
16:
           y = z;
17:
           z = swap;
       r = y \% z;
while (r != 0){
18:
19:
20:
           y = z;
           z = r;
21:
22:
           r = y \% z;
23:
        return z;
    }
```
